

## Projects

The 15 week course will be structured around four main projects. Tutorials and exercises will create specific learning objectives to be applied directly to the current project. Most exercises or tutorials will build on knowledge learned in previous exercises and/or tutorials, culminating in the final two projects. This is a senior level course and the projects are primarily self selected.

The projects are open to students specific interests and require significant exploration and development outside of class time. For clarification on grading and point structure, please see the syllabus and the grading policy.

### Project 1

Establish personal static site based on wire-frame design. Set links for social media etc. Design will be critiqued via the wire-frame. Most focus is to be paid to the design within HTML and CSS most importantly developing the proper framework to progress to dynamic layout.

**Project 1 has multiple aspects the Wire Frame is due DUE beginning of week 3, the HTML translation beginning of Week 5 please be prepared to present your project printed (Wire-frame) and on screen (HTML) for review and critique. 300 points for the combination**

### Project 2

Custom Wordpress themed portfolio site, can be hosted alongside the personal static site but should replace the static site. It should showcase a minimum of 12 works. Project should have 4 integrated sections: portfolio, about (with design statement and short bio), contact, news.

**Project 2 is DUE beginning of week 10, please be prepared to present your project on screen for review and critique. 300 points**

### Project 3

Addressed comments from Week 10 review and added an e-commerce section (clothing/ accessories etc), to your personal website. Store should have a minimum of 12 items. Design will be based on fulfilment site and integrated into the website via plugin.

**Project 3 is DUE during FINALS WEEK, please be prepared to present your project on screen for review and critique during Final week. 150 points  
You will need to submit a pdf layout as well.**

### Project 4

Folio site to work on all browsers and platforms, especially mobile device platforms, via media query or plugin.

**Project 4 is DUE during FINALS WEEK, please be prepared to present your project on screen for review and critique during Final week. 250 points  
You will need to submit a pdf layout as well.**
