Projects

The 15 week course will be structured around six main projects. Tutorials and exercises will create specific learning objectives to be applied directly to the current project. Most exercises or tutorials will build on knowledge learned in previous exercises and/or tutorials, culminating in the final project. This is a senior level course and the projects are primarily self selected.

All projects and presentations are presented on screen for review and critique.

Project 1
Blog and online social media presence

Project 2
