one piece of work

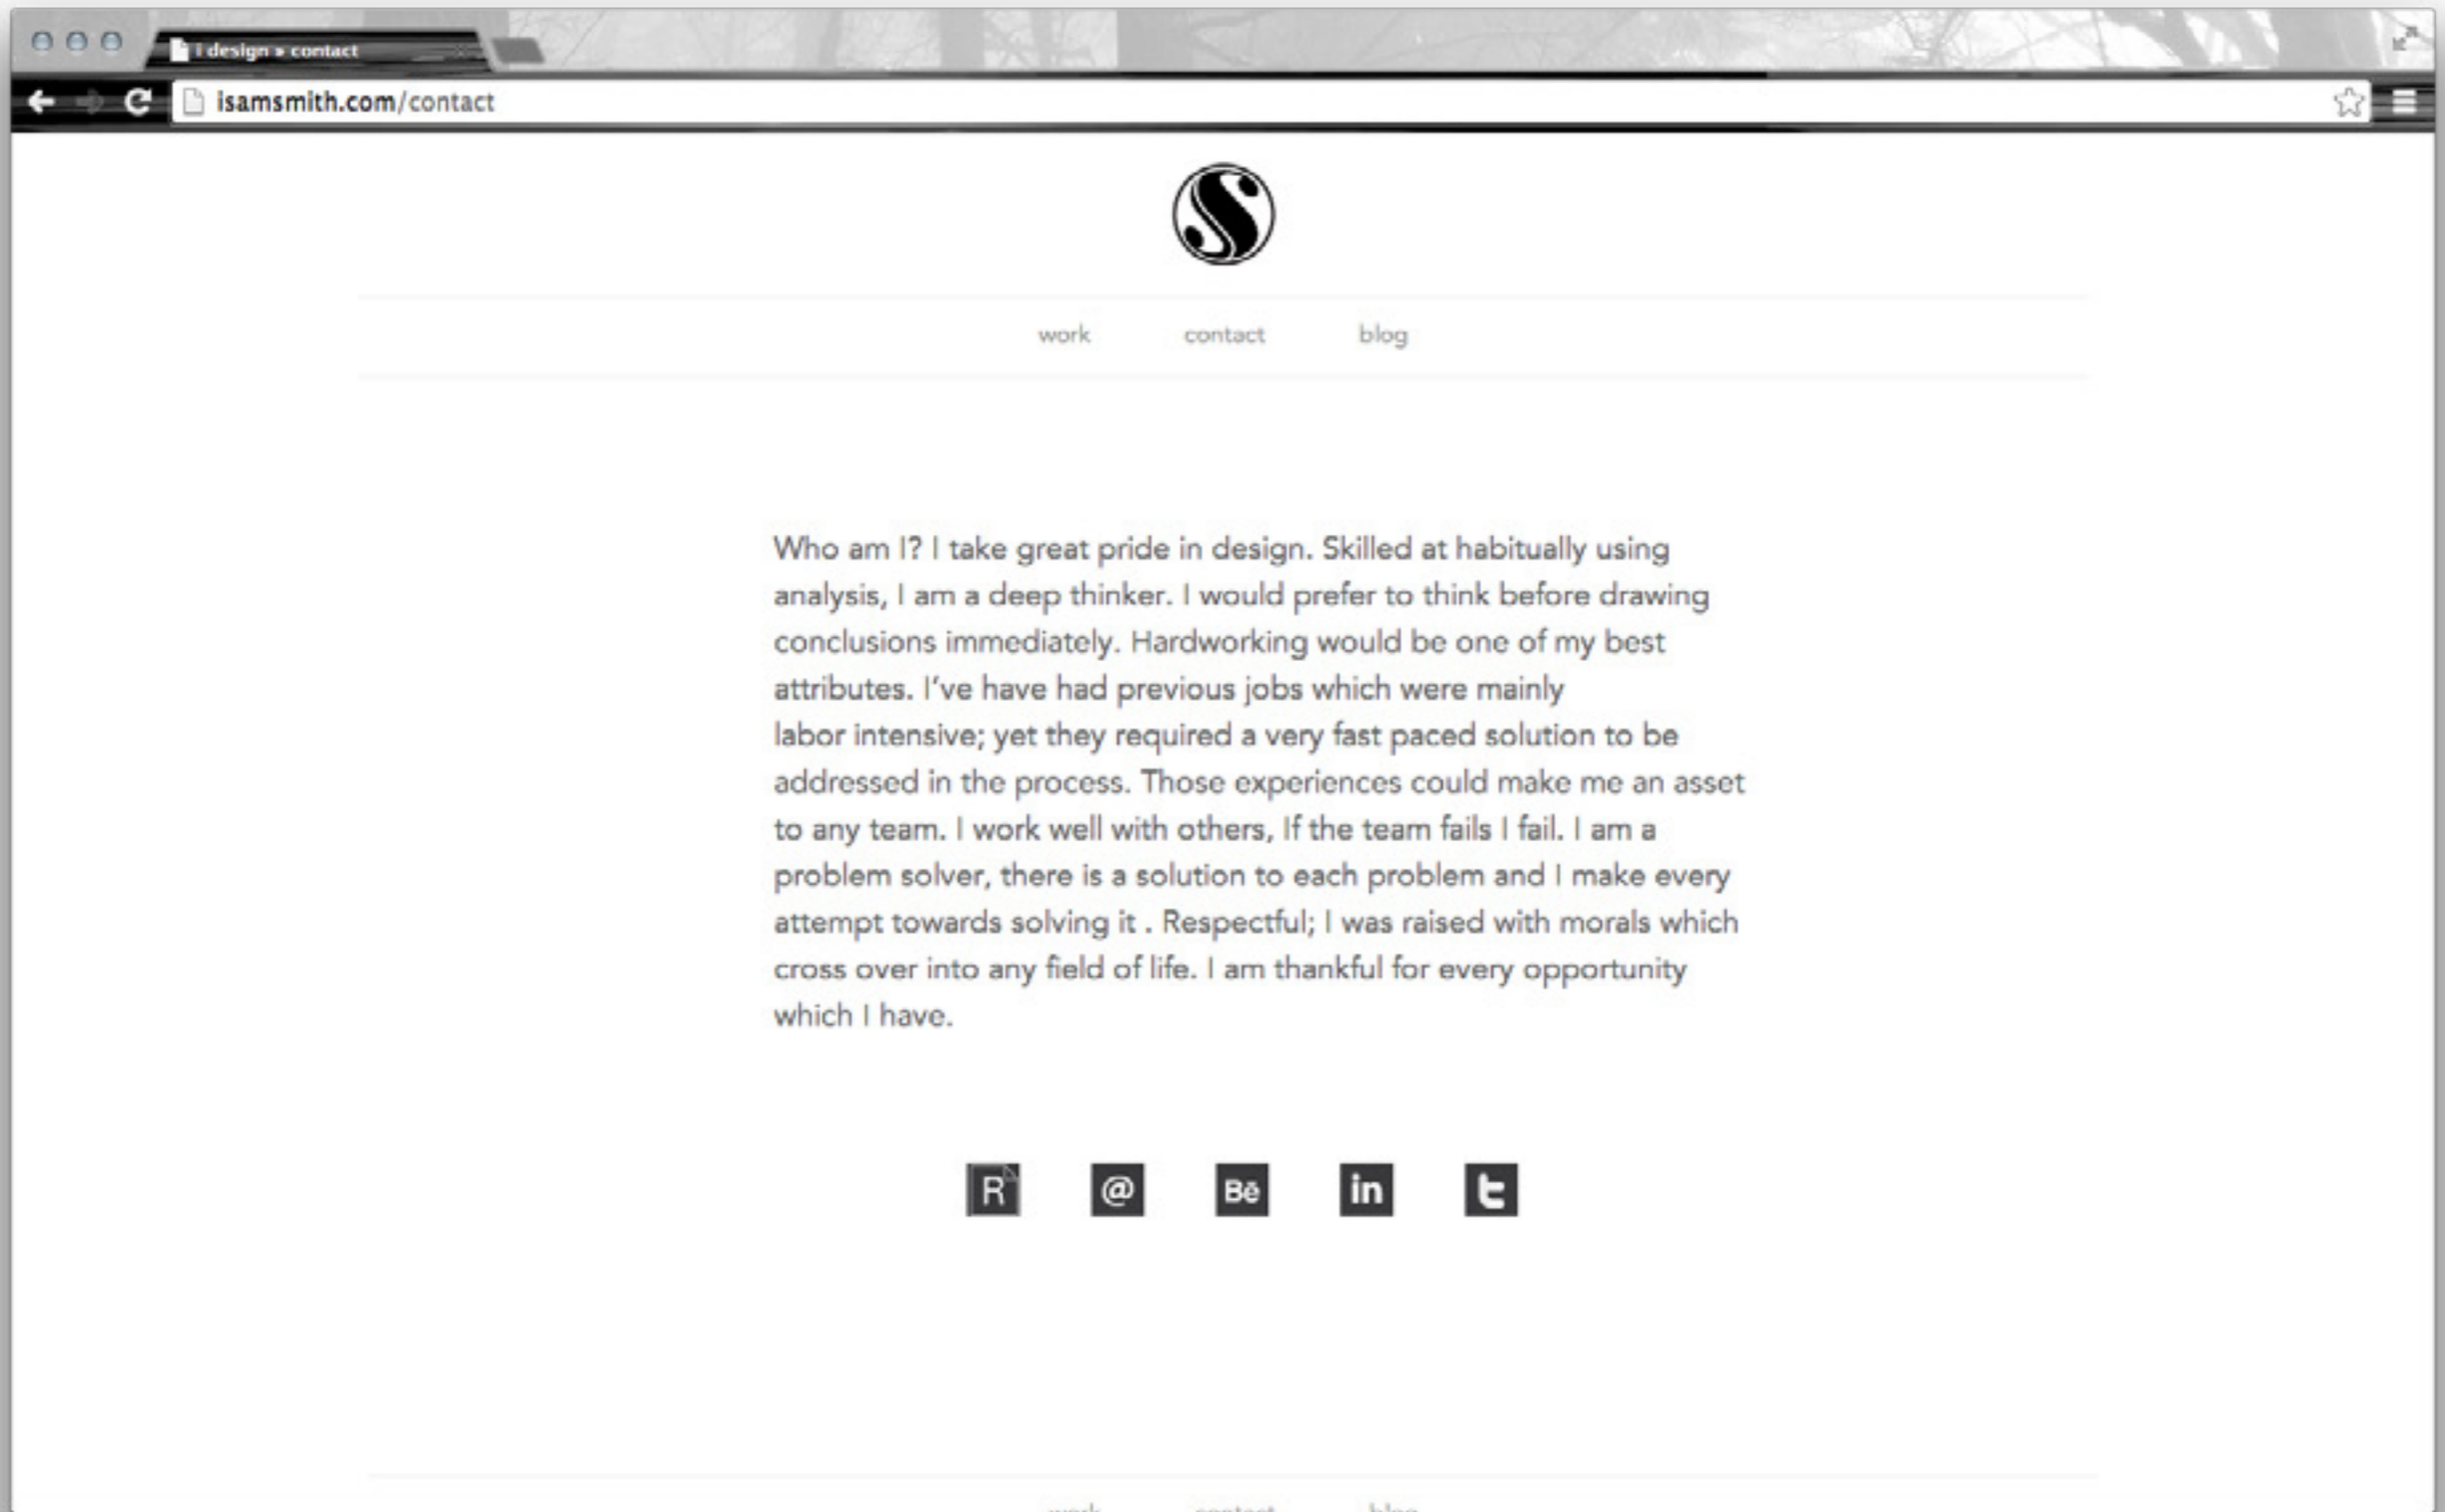

**project**  
Personal Photography

**CLIENT**  
my self

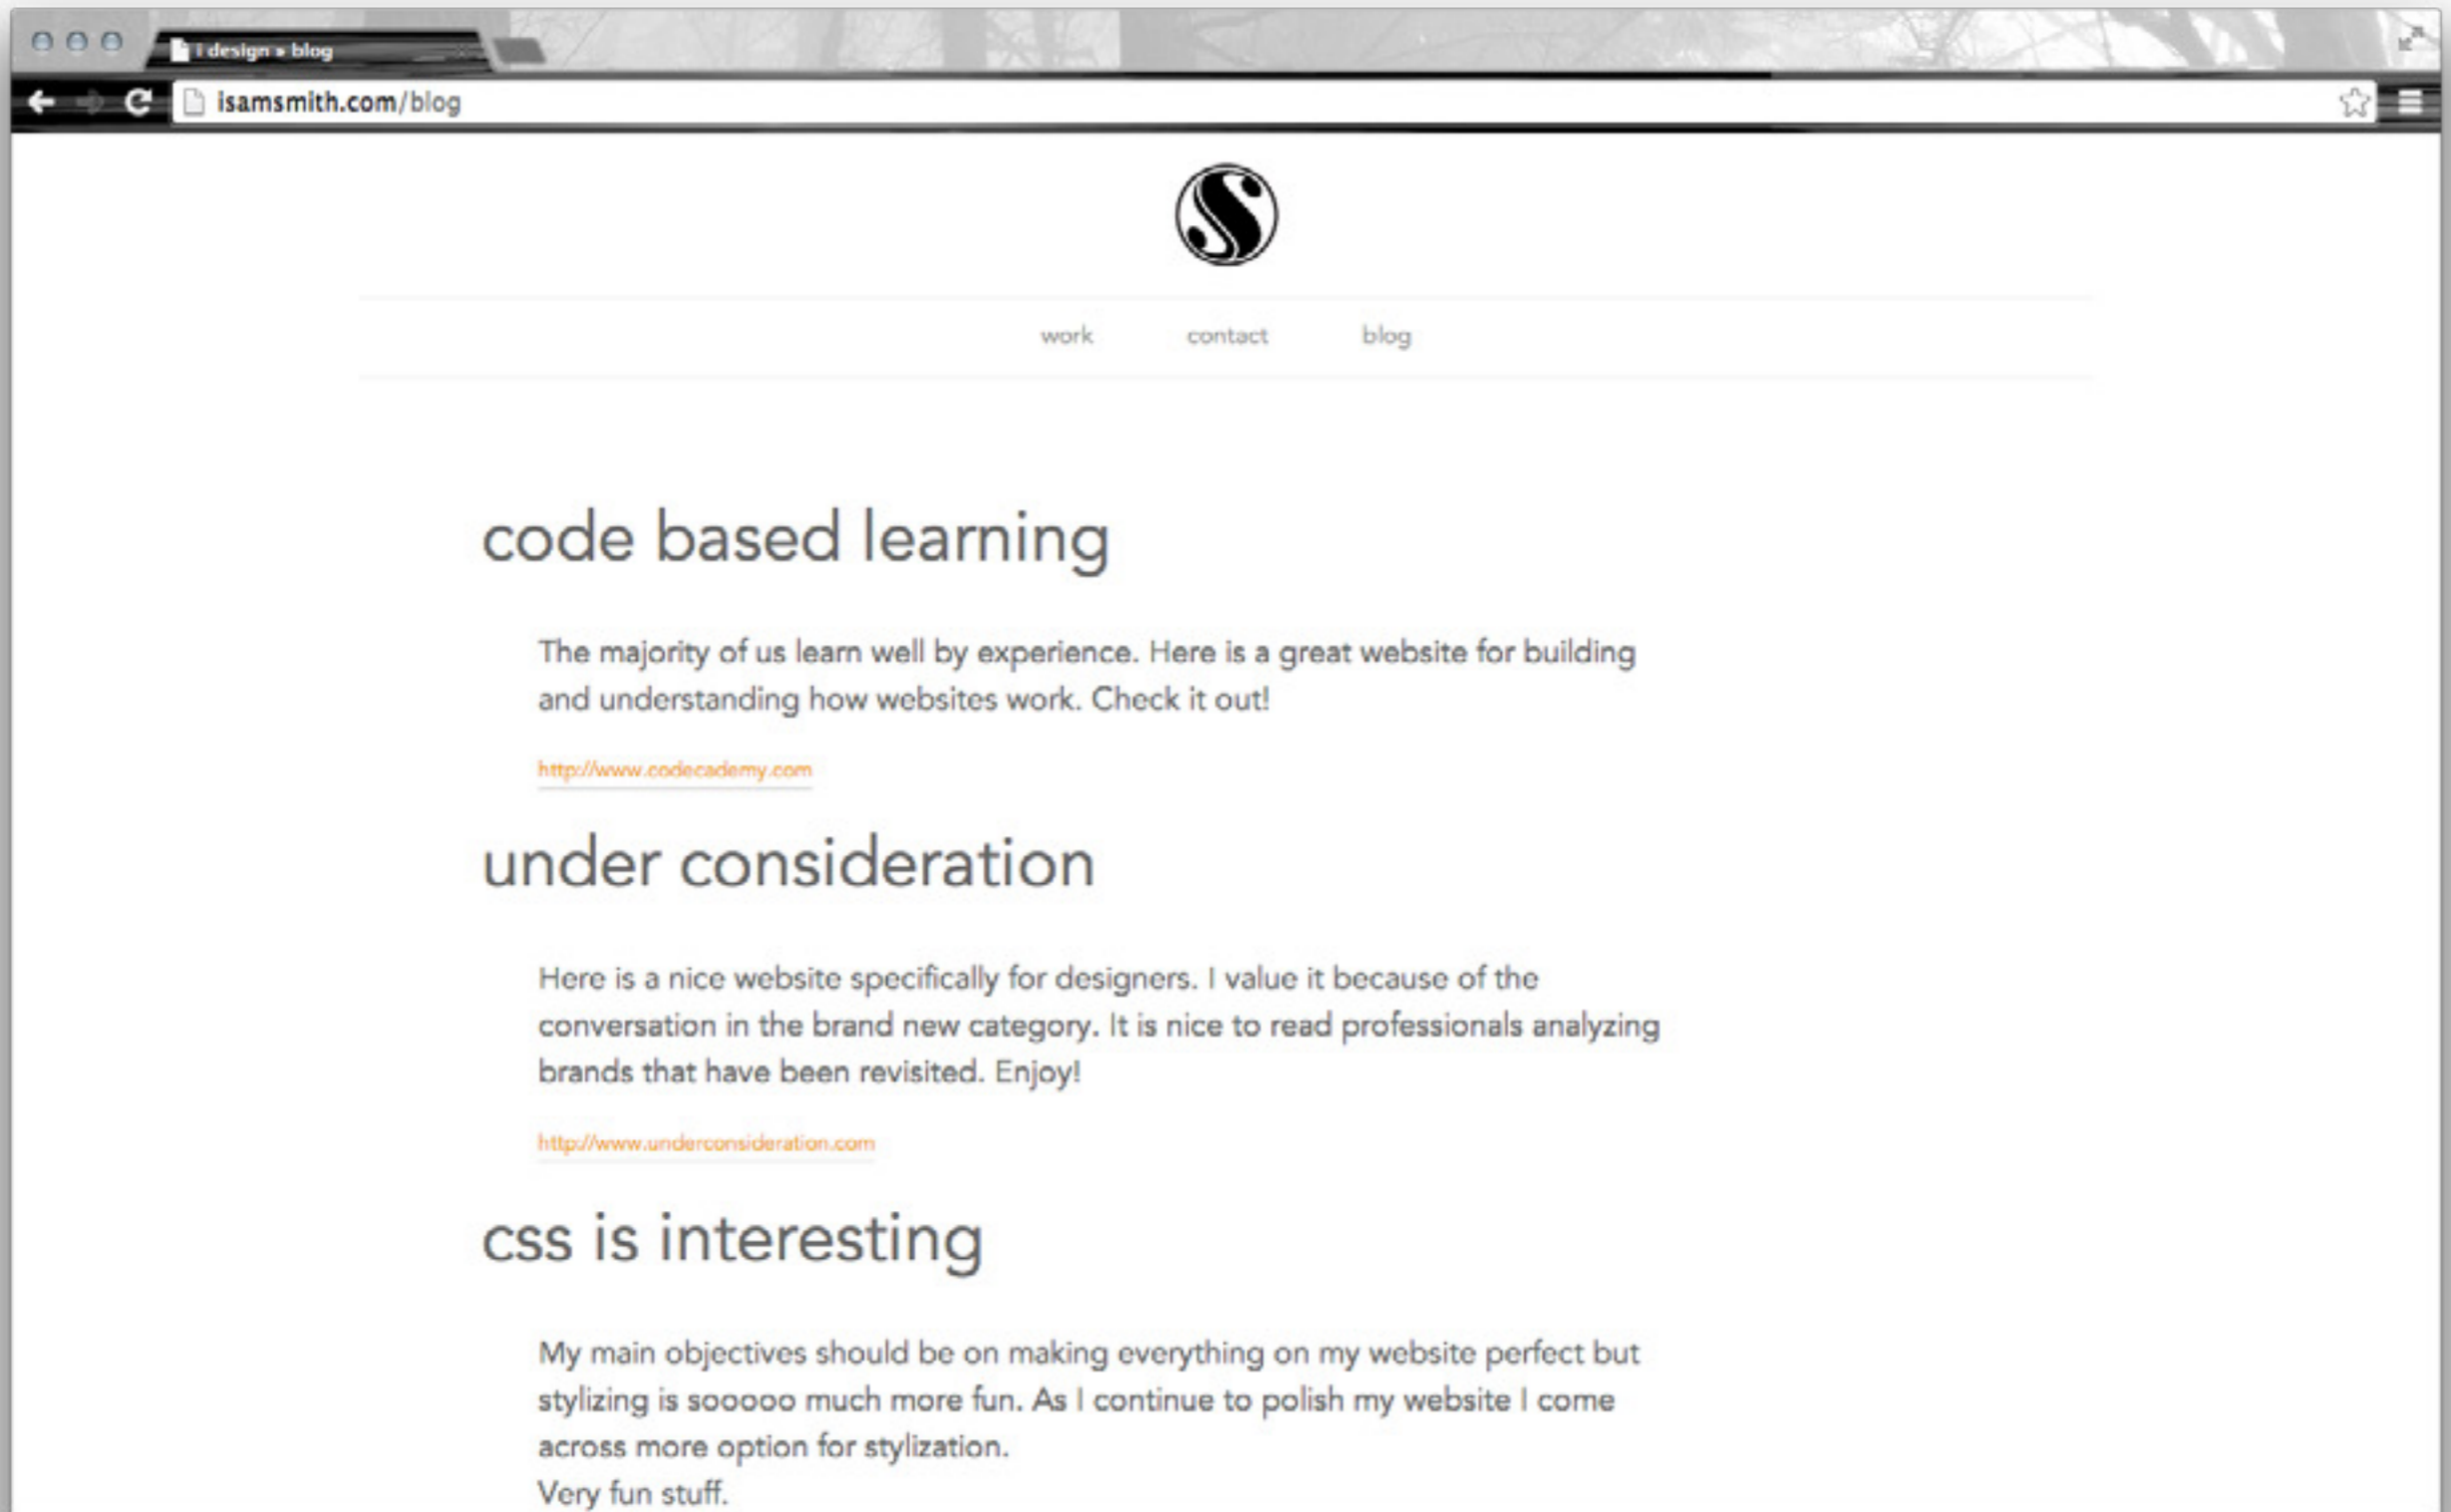

Photoshop  
Nikon d7000

This was a photo which I took on my honeymoon. This photo shows how nature has the innate ability to create beauty. I was lucky to have the pleasure of documenting it.

contact page with a brief description about me.

## code based learning

The majority of us learn well by experience. Here is a great website for building and understanding how websites work. Check it out!

<http://www.codecademy.com>

## under consideration

Here is a nice website specifically for designers. I value it because of the conversation in the brand new category. It is nice to read professionals analyzing brands that have been revisited. Enjoy!

<http://www.underconsideration.com>

## css is interesting

My main objectives should be on making everything on my website perfect but stylizing is sooooo much more fun. As I continue to polish my website I come across more option for stylization. Very fun stuff.

## Heres comes the snow

Tis the season already?

## Productivity For Web Designers

I am dealing with issues on my webpage and life always seem to throw curve balls at the inopportune times. I have been research productivity tips to enhance my over-all web designing experience. Here is some of the things I have been researching.

## I have decided to simplify how I write my code!

I became tired of using Adobe's Dreamweaver. Sublime Text is a sophisticated text editor for code, there are more refined, features and amazing performance. I like the simple interface, dreamweaver has too many features, options and windows with-in it's interface.
